

# FRANK EDUARDO GATTORNO RODRÍGUEZ

## Full Stack Developer & Integrations Engineer

✉ frankegr14@gmail.com ☎ +55 (11)913463247 💼 Engr. Frank Gattorno 🗣️ FrankGattorno 📷 frankeduardo14

📍 Embu das Artes, São Paulo, Brazil

### 📄 SUMMARY

Software Engineer, Full Stack Developer, and Integration Engineer with 5+ years of experience designing, building, and connecting scalable digital solutions across web applications, backend systems, databases, APIs, CRM platforms, project management tools, and automation workflows. Strong background in frontend and backend development, RESTful API design, database architecture, third-party integrations, workflow orchestration, CRM customization, cloud-based deployments, and cross-platform data synchronization. Experienced transforming complex business requirements into reliable, maintainable, and production-ready systems that improve operational efficiency, reduce manual work, increase data accuracy, and create measurable business impact.

### 💼 PROFESSIONAL EXPERIENCE

#### Integration Engineer, NerdyBiz

09/2024 – 05/2026

U.S.A

- Led CRM configuration, automation, and integrations for sales, marketing, invoicing, operations, support, and client follow-up.
- Configured Zoho CRM modules, fields, pipelines, tags, lead sources, workflows, validation rules, assignments, tasks, and custom functions. Used Zoho Deluge and Zoho Flow to automate updates, avoid duplicates, and sync Zoho CRM, Books, Projects, Desk, and Campaigns.
- Worked with Zoho Books for quotes, invoices, recurring billing, payment workflows, client portal visibility, and CRM deal-stage updates. Configured Zoho Projects templates, tasks, milestones, and project creation from CRM stages. Supported Zoho Desk routing and Zoho Campaigns nurture flows.
- Integrated Zoho, Salesforce, GoHighLevel, HubSpot, Pipedrive, Monday.com, ClickUp, Asana, Airtable, Teamwork, JustCall, Slack, Gmail, Calendly, Zoom, Google Sheets, Instantly.ai, Otis AI, WhatsApp, Zapier, Make, n8n, and Workato.
- Configured GoHighLevel pipelines, contacts, tags, custom fields, workflows, lead flows, follow-up sequences, appointment flows, and external integrations. Worked with Salesforce, HubSpot, and Pipedrive on lead/contact sync, field mapping, pipeline alignment, workflow review, and CRM data quality.
- Built Monday.com boards for lead tracking, SLA follow-up, revenue/profit visibility, task management, dashboards, status updates, notes, and CRM ID sync automations.
- Connected JustCall calls, Calendly/Zoom bookings, Slack alerts, Gmail notifications, Google Sheets audits/imports, Instantly.ai leads, Otis AI attribution, and WhatsApp follow-up into CRM workflows.
- Built API integrations using REST APIs, webhooks, OAuth, JWT concepts, JSON/XML mapping, conditional logic, custom functions, Zapier, Make, n8n, and Workato.
- Created custom functions, workflow rules, validation logic, and field mappings to support sales, marketing, invoicing, and operational processes.
- Troubleshooted API errors, webhook failures, expired tokens, duplicates, missing fields, broken automations, sync issues, wrong mappings, and data inconsistencies. Documented workflows, mappings, SOPs, tests, and handoff notes.

#### Full-Stack Developer, XETID

05/2024 – 02/2026

Santa Clara, Villa Clara,  
Cuba

- Engineered full-stack web applications and internal systems using JavaScript, TypeScript, Python, PHP, Java, C#, C++, SQL, React.js, Vue.js, Node.js, Express.js, Laravel, Django, FastAPI, Spring Boot, .NET, PostgreSQL, MySQL, SQL Server, Docker, Linux, Nginx, Git, and GitHub.
- Built frontend architectures with React.js, Vue.js, TypeScript, reusable components, state management, responsive layouts, forms, tables, filters, routing, API-driven views, dashboards, and modern JavaScript patterns.
- Developed backend systems and RESTful APIs with Laravel, Node.js, Express.js, Python, Django/FastAPI, Java Spring Boot, and .NET/C#, implementing authentication, authorization, validation, service layers, background jobs, error handling, file handling, and database persistence.
- Designed relational database solutions with PostgreSQL, MySQL, SQL Server, and managed PostgreSQL databases, including schemas, migrations, relationships, joins, indexes, stored procedures, query optimization, data integrity rules, reporting logic, search/filter features, and data cleanup.
- Implemented integrations using REST APIs, webhooks, OAuth 2.0, JWT, JSON/XML payloads, event-driven sync, API testing, field mapping, external services, and structured error handling.
- Applied OOP, SOLID Principles, MVC, clean architecture, modular design, reusable services, separation of concerns, code reviews, logging, debugging, refactoring, documentation, and automated testing concepts.
- Supported deployment workflows using Git, GitHub, GitHub Actions, Docker, Nginx, Linux, CI/CD pipelines, environment configuration, cloud hosting, AWS fundamentals, Vercel, Netlify, and managed PostgreSQL databases.
- Improved reliability, maintainability, and performance by refactoring legacy code, optimizing queries, standardizing API contracts, documenting technical flows, troubleshooting production issues, modernizing internal systems, and supporting technical handoff.

#### Software Engineer Intern, XETID

12/2020 – 05/2024

Santa Clara, Villa Clara,  
Cuba

- Developed a custom CRM to display and manage data from a legacy university system.
- Built the solution using Node.js, Express, Vue.js, and PostgreSQL.

- Supported the modernization of internal processes by improving access to structured data and streamlining information management.
- Gained hands-on experience in full-stack development, database integration, and business application design.
